

» ZYJ Larger Entrance Vibrating Screen

Description

ZYJ series are designed for you to easily observe materials processing with bigger materials inputs, the principle same as ZYD

Functional principle

1. Round design, no dust pollution, no leaking liquid.
2. Structure is suitable for small volume and light heavy, easy to be installed and maintained.
3. Rapidly clear up each material and grain inside the slurry, the solid matter can automatically discharge.
4. Adjustable outlet, facilitate to replace the screen.

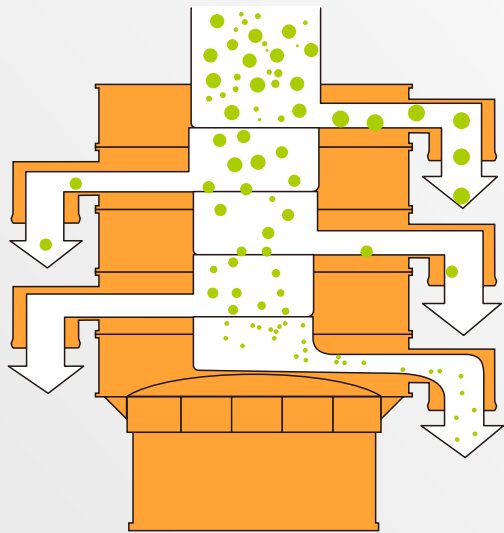

Application

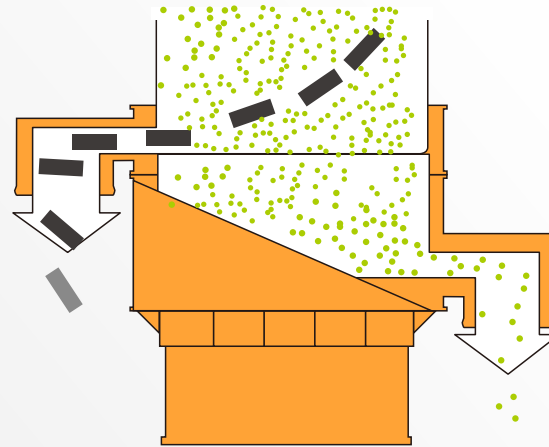

The application same as ZYD, it is especially suitable for the filtration of slurry, glaze and pigment in ceramic industry.

Technical Parameter

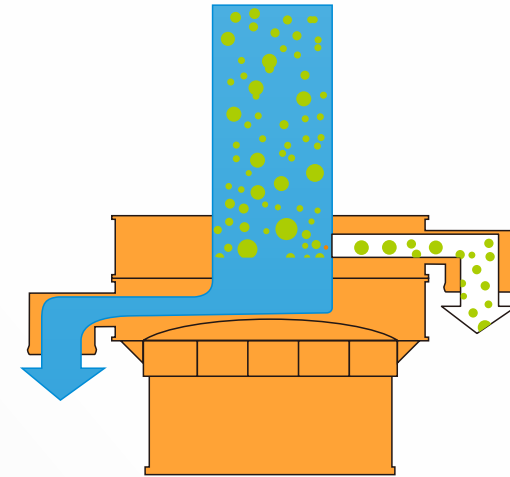

Model	Power(Kw)	Sieving Diameter(mm)	Dimension L×W×H(mm)	layer
ZYJ-400-1S	0.18	320	580×580×660	1
ZYJ-600-1S	0.55	550	800×800×780	1
ZYJ-800-1S	0.75	750	900×900×930	1
ZYJ-1000-1S	1.5	950	1160×1160×1030	1
ZYJ-1200-1S	1.75	1150	1360×1360×1160	1
ZYJ-1500-1S	2.2	1450	1850×1850×1330	1
ZYJ-1800-1S	2.2	1750	2200×2200×1460	1

Grading

Removal of impurity

Solid-liquid Separation
